## **DETAILED ACTION**

### ***Remarks***

1. The Office Action, mailed April 12, 2007, set forth the approval of the request for deferral/suspension of action under 37 CFR 1.103. The Office Action also included a Miscellaneous Office Action to withdraw the Office Action mailed March 20, 2007. As noted in the Miscellaneous Office Action, the examiner had overlooked the request for a three month suspension submitted with the Request for Continued Examination (RCE) on February 26, 2007. The examiner has repeated below the Office Action previously vacated given that the suspension has expired.

(Action originally sent to applicant on March 20, 2007 and vacated on April 12, 2007.)

### ***Continued Examination Under 37 CFR 1.114***

2. A request for continued examination under 37 CFR 1.114, including the fee set forth in 37 CFR 1.17(e), was filed in this application after allowance or after an Office action under *Ex Parte Quayle*, 25 USPQ 74, 453 O.G. 213 (Comm'r Pat. 1935). Since this application is eligible for continued examination under 37 CFR 1.114, and the fee set forth in 37 CFR 1.17(e) has been timely paid, prosecution in this application has been reopened pursuant to 37 CFR 1.114. Applicant's submission filed on February 26, 2007 has been entered.

### ***Double Patenting***

3. The nonstatutory double patenting rejection is based on a judicially created doctrine grounded in public policy (a policy reflected in the statute) so as to prevent the unjustified or improper timewise extension of the "right to exclude" granted by a patent and to prevent possible harassment by multiple assignees. A nonstatutory

Art Unit: 2862

obviousness-type double patenting rejection is appropriate where the conflicting claims are not identical, but at least one examined application claim is not patentably distinct from the reference claim(s) because the examined application claim is either anticipated by, or would have been obvious over, the reference claim(s). See, e.g., *In re Berg*, 140 F.3d 1428, 46 USPQ2d 1226 (Fed. Cir. 1998); *In re Goodman*, 11 F.3d 1046, 29 USPQ2d 2010 (Fed. Cir. 1993); *In re Longi*, 759 F.2d 887, 225 USPQ 645 (Fed. Cir. 1985); *In re Van Ornum*, 686 F.2d 937, 214 USPQ 761 (CCPA 1982); *In re Vogel*, 422 F.2d 438, 164 USPQ 619 (CCPA 1970); and *In re Thorington*, 418 F.2d 528, 163 USPQ 644 (CCPA 1969).

A timely filed terminal disclaimer in compliance with 37 CFR 1.321(c) or 1.321(d) may be used to overcome an actual or provisional rejection based on a nonstatutory double patenting ground provided the conflicting application or patent either is shown to be commonly owned with this application, or claims an invention made as a result of activities undertaken within the scope of a joint research agreement.

Effective January 1, 1994, a registered attorney or agent of record may sign a terminal disclaimer. A terminal disclaimer signed by the assignee must fully comply with 37 CFR 3.73(b).

4. Claims 1, 4-10, 13 and 16-26 are rejected on the ground of nonstatutory obviousness-type double patenting as being unpatentable over claims 1-18 of U.S. Patent No. 7,113,254 (Van Der Net, et al.). Although the conflicting claims are not identical, they are not patentably distinct from each other. Independent claim 1 is fully met by claims 1-3 of Van Der Net (US 7,113,254). Independent claim 13 is fully met by claims 11-13 of Van Der Net (US 7,113,254). Likewise, dependent claims 4-10, 16-20, 23 and 24 correspond to claims 4-7, 1, 8, 9, 14, 17, 16, 17, 18, 2 and 9 respectively of Van Der Net (US 7,113,254).

Regarding claims 22 and 25, the claims of Van Der Net (US 7,113,254) do not set forth the limitation "configured to purge gas mixture flow rate of at least 20 liters per minute." However, it would have been obvious to one of ordinary skill in the art at the time the invention was made to modify the claims of Van Der Net (US 7,113,254) to include the flow rate of 20 liters per minute, since it has been held that discovering an

optimum value of a result effective variable involves only routine skill in the art. In re Boesch, 617 F.2d 272, 205 USPQ 215 (CCPA 1980).
